Committee members met at the Traffic Operations Center (TOC) in Salt Lake City where representatives of the Utah Department of Transportation led a tour of the facility and demonstrated how operators at the TOC can monitor traffic, detect roadway incidents and crashes, and take actions necessary to return traffic flow to normal by using traffic and weather sensors and almost 600 cameras. The Committee also toured and received an update on the 11400 South construction project that will add a new interchange on I-15 and widen 11400 South from State Street to Bangerter Highway.
